

Sprint 4

Demo notes

13/5/22

Showing off the layout + ERP

AdminLTE uses Bootstrap

Bootstrap + Bulma are competitors
so we need to choose 1 and
work with it

Materials + Pallets

Physicist Relationship

A lot of orders can be a Zero to Many
instead of One to Many

Order to Order Materials should be ~~1~~
Order Materials to Materials the same

AdminLTE can hide elements behind login
use roles to hide elements

easy to find
as miss?

← look at position of buttons (start/pause/stop)
maybe at the top bar
check with production workers for preference

look at translation array in Laravel

lang files in php dir json

can add to that file

look at this and the login page
blade

received info on lang packs

possible to add language attribute to users

look at loswel9 Auth files and
see what differences are

or
uninstall Auth Bldos/routes
and do ~~again~~ auth Postify
(see phone screenshot)

Log model

create observers for
each model but
affects the order

look at a log table/needle to
record changes + updates

Observers technique in loswel
